Tchibum! Baby Water Safety Classes

From the first two levels (10 in all) of the **Swimming Stars™** International Educational Evaluation levels

Level 1: Twinkle Stars (Age 6 – 12 mnths)

Level 2: Shining Stars (Age 13 – 24 mnths)

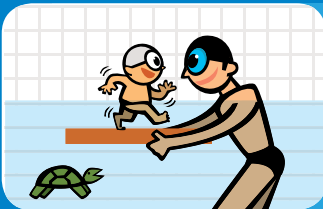

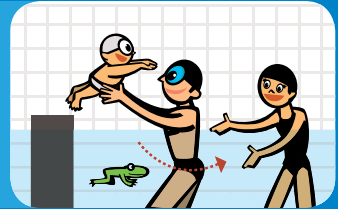

Tchibum! classes are conducted with the parent / caregiver in the water to optimise the baby's pleasure and minimise fear.

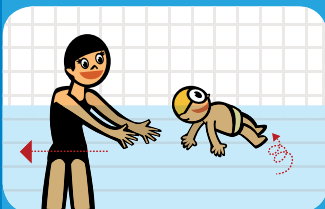

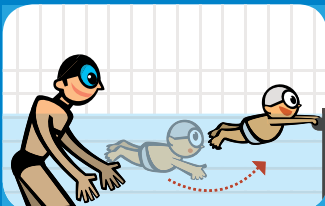

Class Ratio: 1 **Tchibum!** Instructor – 4 / 5 Little Swimmers

Class Duration: 30 minutes to give Little Swimmers lots of time to repeat.

In **Tchibum!** the well trained instructor demonstrates and handles each child during the 30 minute lesson.

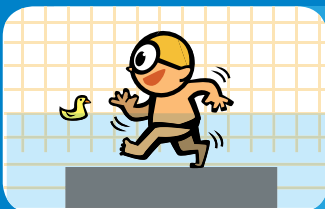

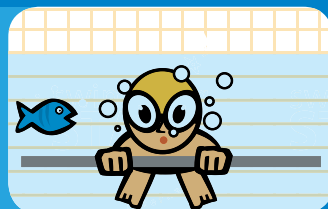

In **Tchibum!** parents / caregivers repeat new as well as known skills throughout the lesson on the instructor prompt. This ensures maximum skill retention.

Tchibum! Focuses on:

- the reintroduction to water as a baby's first awareness is of being water borne.
- instinctive and conditioned reaction to life threatening situations (24 months and younger).
- essential Water Safety and Breath Control Survival Skills.
- development of Psychomotor Skills.

Tchibum! Is based on the Infant and Toddler's physical, intellectual, emotional and social development skills and aquatic abilities.

Tchibum! Combines and repackages 50 years' knowledge and experience of international Infant and Toddler water safety teaching methods practiced in various countries including the USA, Australia, Canada, Argentina, South Africa and Brazil.
